Summary

I am a skilled and dedicated React Front-End Web Developer with a passion for creating engaging, user-friendly, and high-performance web solutions. I empower businesses and individuals to elevate their digital presence with expertly crafted React front-end web interfaces.

My journey into web development began with an innate curiosity and a drive to understand the digital world. I quickly mastered HTML, CSS, and JavaScript, discovering the power of the React library along the way. This dedication led me to work on a groundbreaking project, showcasing my ability to deliver top-notch results and bring clients' visions to life.

Committed to staying up-to-date with the latest industry trends and best practices, I ensure my clients receive the most innovative and efficient solutions possible. My strong work ethic and unwavering dedication to excellence make me the go-to expert for businesses and individuals seeking to elevate their digital presence.

Whether it's a small-scale project or a large, complex application, my technical expertise and commitment to delivering outstanding results make me the ideal partner for all your front-end development needs, specializing in high-performance React web solutions.

Experience

Frontend Web Developer

Josor Steels

Feb 2023 - Present (3 months)

The company "Josor Steels" needed a new website to replace their old one. They also needed someone to redraw their logo so that it is scalable. I was tasked with designing the website, redrawing its logo, and developing it.

I redrew the logo using Adobe Illustrator with a light background, a dark background, and a transparent background and exported it in different formats including SVG, PNG, and ICO. Then, I proceeded by designing the website using Adobe XD. After that, I developed the website using ReactJS, taking the mobile-first approach.

The website hosted on <https://yazeedmomani.github.io/josor-steels> is the result of my work. All that is left is to add the contents and deploy it.

Education

Princess Sumaya University for Technology

Bachelor of Science - BS, Software Engineering

2023 - 2026
